PROFILE

Aspiring computer programmer pursuing Under Graduation on BTech Computer Science with spec in AI & ML and proven problem-solving and troubleshooting skills. And also a enthusiastic person who worked as a junior Web Developer for Biosphere Club and designed the club website, also worked in Checkedit Organization as a Developer.

CERTIFICATIONS

- IIT Madras Certified for C, C++ and Python Coding competition.
- Certificate of completion for a Full Stack Web Development course by Udemy.
- Certificate of completion for Ethical Hacking course by Udemy.
- Attended Workshop for Flutter Development

PROJECTS

HANG MAN GAME

- This was my first individual project and I created this game by only using Python.
- This project helped me to gain experience and was my first step to the programming world.

SUPERMARKET STORE WEBSITE

- Worked on this project as a group in my first year of engineering.
- This is a grocery store website just like Big-Basket where people can add and buy items.
-

BIOSPHERE MAIN WEBSITE

- This was my first official club project where I need to make the Club Website with my former team members.
- This was really quite challenging which made me to stay overnight and complete this project but this project helped me and showed me that if we want anything we can achieve.

EDUCATION HISTORY

High School   2019 - 2021

Narayana College

- This is the college where I have done my High School.
- Passed the college with 86% percent in boards.

B Tech in
CSE with spec in AI & ML   2021 - 2025

Vellore Institute Of Technology

- Will be Completing my Under Graduation
- This is like dream come true moment for me because the thing which I dreamt for finally I am pursuing it.
